

**Some helpful materials. These are provided for your help; you can use other resources as well.**

**For obtaining sprites:** <https://www.sprites-resource.com/>

**For removing greenscreen from images:**

<https://www.aatbio.com/tools/online-automatic-green-screen-remover>

(Click on the color you want to remove, then set the transparency key, then click ok, and then download.)

**For turning .mp3 audio to .ogg audio (SFML does not support mp3):**

<https://convertio.co/mp3-ogg/>

**Video to explain collision:** <https://www.youtube.com/watch?v=Y4uF4a8c39o>

Watch from 00:32 onwards. (I forgot to add a collision point at the end; there are supposed to be three collision points at the bottom, like there are three at the top.)
